Sri Chaitanya College of Education, Hyderabad

Scored 98.6% (986 out of 1000) in Intermediate Education

PROJECTS

BlackJack Terminal Game

2022

Java

- In this project, we developed a terminal-based BlackJack game (Casino Game) as a beginner-level project in Java.
- I was an integral part of the project team, and contributed to the success of the project by utilizing my skills and knowledge in Java.

Winning Probability of BlackJack

2022

Python

- In this project, we have calculated the probability of winning the card game called "BLACKJACK" in different instances.
- Calculated the probability of winning blackjack in different scenarios by building a Monte Carlo simulator using Python's NumPy library; increased game's profitability by 15%
- I was assisting with the project's back end. I used my knowledge of Python to successfully complete the project.

Zomato Profitability Analysis

2022

Python

- As a beginner-level Data Science Project, we as a team analyzed the ways Zomato can gain profit by classifying their restaurants into different categories and taking the commission from them according to their category.
- I excel at data science, which allowed me to apply my skills to a project and helped my team earn high marks for the endeavor.
- We put our 100% analyzing skills and knowledge to increase the profitability of Zomato.

ResuMate – The Effortless Resume Evaluation Tool

Present

Python

- The project is to create a technology-based solution that provides personalized feedback and guidance to job seekers, helping them to improve their resumes and increase their chances of being selected for an interview.
- Now, I am working on both the frontend and backend of my project in my capacity as team leader.
- Completed 75% of the work and still in progress to reach our goal.
